

## Condor

Thursday, 28 February 2008

CONDOR. A high altitude fighter/bomber used by Cobra. The Condor Z-25's forward fuselage could separate from the rear of the plane, splitting it into two separate aircraft. Its armaments included two electron-pulsating, no thrust air-to-surface missiles, two low-drop terrain-hugging "Smacker" missiles, seven SK-44m wide-concussion , incendiary bombs and dual laser support cannons armed with 3700 laser rounds. Cobra's Aero-Vipers piloted these jets. The Joes first encountered a Condor flying high over the tiny nation of Punta del Mucosa.
