

Despoiler

Thursday, 28 February 2008

DESPOILER. A small, one-man VTOL (vertical take-off and landing) aircraft used by Destro as his personal craft. The Despoiler was a short-range hoverjet that Destro primarily used to patrol his land in Scotland. The vehicle -- designed and built by Destro's company, MARS -- was armed with two "Deluge I" mini-missiles of Destro's own design, and twin "Rabid" rapid burst 20mm cannons. The Despoiler was one of the first vehicles of the Iron Grenadier army. It was first spotted in Scotland when Cobra staged an assault on Castle Destro.
